### DETAILED ACTION

**Claims 1-41 and 43-44** are pending in the instant application. Furthermore, the addition of **Claims 43 and 44** as well as the cancellation of **Claim 42** is acknowledged, and **Group I** is hereby expanded to include **Claims 43 and 44** (in part).

#### *Response to Restriction*

Applicants' election without traverse of **Group I, Claims 1-27 and 33-41** (in part), drawn

to compounds represented by Formula (I), (I), and specific compound

of Example 114 of Table 1, , classified in class 548, subclass 470, depicted on page 52 of the specification is acknowledged.

The inventions of Groups I and II are independent and distinct because there is no patentable coaction between the Groups and a reference anticipating one member will not render another obvious. Each group is directed to art recognized as divergent in subject matter requiring different search strategies for each group. Moreover, the Examiner must perform a commercial database search on the subject matter of each group in addition to a paper search, which is burdensome to the Examiner. Thus, the restriction set forth July 12, 2005 is deemed proper.

Art Unit: 1626

As stated in the restriction requirement, the Office will review the claims and disclosure to determine the scope of the independent invention encompassing the elected compound and examination will then proceed on the elected compound and the entire scope of the invention encompassing the elected compound as defined by common classification.

Regarding requests for rejoinder, as stated in the restriction requirement, rejoinder will be permitted when a product claim is found allowable and then the withdrawn process or methods claims which depend from or otherwise include all limitations of an allowed product claim will be rejoined.

*Scope of the Invention of the Elected and Examined Subject Matter is as Follows:*

Compounds of Formula (I),

(I), depicted in **Claim 1**, wherein:

- **B** is -N- and **A** is =CR<sup>1</sup>; or
- **B** is =C- and **A** is NR<sup>1</sup>;
- **R**<sup>1</sup> is as defined, *except* where **R**<sup>11</sup> and **R**<sup>12</sup> are (C<sub>1-6</sub>)alkyl-Het, where **Het** is a heterocyclic group other than a 4- or 5-membered nitrogen-containing heterocyclic group and *except* where both **R**<sup>12</sup> groups are covalently bonded together and to the nitrogen to which they are both attached to form other than a 5-membered saturated heterocyclic group;
- the group -C(=Y<sup>1</sup>)-Z is covalently linked to either **M**<sup>2</sup> or **M**<sup>3</sup>,
- **M**<sup>1</sup> is as defined;
- **M**<sup>2</sup> or **M**<sup>3</sup>, when not linked to -C(=Y<sup>1</sup>)-Z, is as defined;

Art Unit: 1626

- $M^4$  is as defined;
- $Y^1$  is as defined;
- $Z$  is as defined;
- $R^2$  is as defined, *except* where **Het** is a heterocyclic group other than a 4- or 5-membered nitrogen-containing heterocyclic group;
- $R^3$  is as defined, *except* where **HCy** is a heterocyclic group other than a 4- or 5-membered nitrogen-containing heterocyclic group;
- $R^{4a}$ ,  $R^{4b}$ , and  $R^5$  each are as defined;
- $R^{60}$  is as defined, *except* where any of the substituents are heterocyclic groups other than 4- or 5-membered nitrogen-containing heterocyclic groups and *except* where **HCy** is a heterocyclic group other than a 4- or 5-membered nitrogen-containing heterocyclic group;
- $R^{150}$  is as defined, *except* where any of the substituents are heterocyclic groups other than 4- or 5-membered nitrogen-containing heterocyclic groups and *except* where **HCy** is a heterocyclic group other than a 4- or 5-membered nitrogen-containing heterocyclic group;
- $R^{160}$  is as defined, *except* where any of the substituents are heterocyclic groups other than 4- or 5-membered nitrogen-containing heterocyclic groups and *except* where both  $R^{162}$  groups are covalently bonded together and to the nitrogen to which they are both attached to form other than a 5-membered saturated heterocyclic group;
- $R^O$  and  $R^C$  are as defined, *except* where **Het** is a heterocyclic group other than a 4- or 5-membered nitrogen-containing heterocyclic group;

Art Unit: 1626

- $R^{N1}$  is as defined, *except* where **Het** is a heterocyclic group other than a 4- or 5-membered nitrogen-containing heterocyclic group;
- $R^{N2}$ ,  $R^{N3}$ , and  $R^{N4}$  are as defined, *except* where  $R^{N3}$  and  $R^{N1}$  or  $R^{N2}$  and  $R^{N1}$  are covalently bonded together to form a heterocyclic group other than a 4- to 5-membered heterocyclic nitrogen-containing group;

or a salt thereof.

The scope of Applicant's independent invention, set forth in Group I, encompasses all compounds within the scope of the claims of Group I which fall into the same class as the selected compound. All compounds falling outside the class of the selected compound are heretofore directed to nonelected subject matter and are withdrawn from consideration under 35 U.S.C. 121 and 37 C.F.R. 1.142(b).

Regarding the scope of compounds set forth above, the compounds are free of prior art and are drawn to allowable subject matter. Amendments to the claims in order to conform with the scope set forth above and cancellation of nonelected subject matter will put Applicant's claimed invention in condition for allowance. Applicant has the right to file divisional applications on the remaining subject matter.

***Scope of the Nonelected Subject Matter:***

As a result of the election and the corresponding scope of the invention identified *supra*, the remaining subject matter of **Claims 1-27, 33-41, and 43-44** which is not drawn to the above elected invention as well as claims **28-32** are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions. The remaining compounds which are not within the elected invention, which are independent and distinct from the elected invention

and do not have unity with the elected compound and are therefore withdrawn by means of a restriction requirement.

The abovementioned withdrawn compounds which are withdrawn from consideration as being nonelected subject matter differ materially in structure and composition from the compounds of the elected invention. The withdrawn compounds contain varying functional groups which differ from those of the elected invention, such as 6-, 7-, and 8-membered heterocyclic groups, etc. which are recognized to differ chemically in both structure and function.

This recognized chemical diversity of the functional groups can be seen by the various classification of these functional groups in the U.S. classification system, i.e. class 540 7-membered or larger nitrogen-containing heterocyclic rings; class 544 6-membered heterocyclic rings with at least two heteroatoms one of which is nitrogen, class 546 6-membered heterocyclic rings with one nitrogen as the only heteroatom, etc.

Therefore, the compounds which are withdrawn from consideration as being nonelected subject matter differ materially in structure, function, and composition and have been restricted properly as a reference that anticipated, but the elected subject matter would not even render obvious the nonelected subject matter. The fields of search required for the nonelected versus the elected compounds are not coextensive.

#### ***Priority***

Applicant's claim for domestic priority under 35 U.S. 119(e) is acknowledged. The provisional application 60/441,674 upon which priority is claimed provides adequate support under 35 U.S.C. 112 for **Claims 1-41** and **Claims 43-44** of this application. Therefore, the

Art Unit: 1626

priority date given for this application is January 22, 2003, from the aforementioned provisional application.

### ***Information Disclosure Statement***

Applicant's information disclosure statements (IDS), filed on September 2, 2004 and August 12, 2005, have been considered. Please refer to Applicant's copies of the 1449 submitted herewith.

### ***References Cited***

If a copy of a provisional application listed on the bottom portion of the accompanying Notice of References Cited (PTO-892) form is not included with this Office action and the PTO-892 has been annotated to indicate the copy was not readily available, the copy could not be readily obtained when the Office action was mailed. Should Applicant desire a copy of such a provisional application, Applicant should promptly request the copy from the Office of Public Records (OPR) in accordance with 37 CFR 1.14(a)(1)(iv), paying the required fee under 37 CFR 1.19(b)(1). If a copy is ordered from OPR, the shortened statutory period for reply to this Office action will not be reset under MPEP § 710.06 unless Applicant can demonstrate a substantial delay by the Office in fulfilling the order for the copy of the provisional application. Where the applicant has been notified on the PTO-892 that a copy of the provisional application is not readily available, the provision of MPEP § 707.05(a) that a copy of the cited reference will be automatically furnished without charge does not apply.

### ***Claim Objections***

**Claims 1-27** (in part), **33-41** (in part), and **43-44** (in part), as well as **Claims 28-32** are objected to for containing nonelected subject matter.
